The perturbative STH picture

The perturbative STH picture

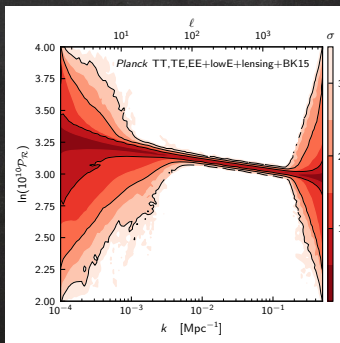

$$\ddot{\phi} + 3H\dot{\phi} + V'(\phi) = 0$$

$$H^2 \equiv \left(\frac{\dot{a}}{a}\right)^2 = \frac{1}{3} \left(\frac{\dot{\phi}^2}{2} + V(\phi)\right)$$

$$\mathcal{P}_{\mathcal{R}} = \frac{H^4}{4\pi^2 \dot{\phi}^2} \left(\frac{k}{aH}\right)^{n_s - 1}$$

$$\mathcal{P}_{\mathcal{T}} = \frac{2}{\pi^2} H^2 \left(\frac{k}{aH}\right)^{n_T}$$

The perturbative STH picture

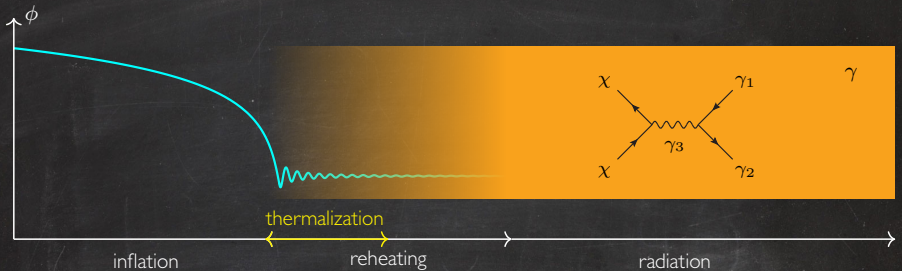

$$\ddot{\phi} + (3H + \Gamma_{\phi})\dot{\phi} + V'(\phi) = 0$$

The perturbative STH picture

The perturbative STH picture

Freeze-out:

- Thermal equilibrium
- Thermal production
- $Y_X \leftrightarrow \langle \sigma v \rangle_{\text{ann}}$
- IR dominated

The perturbative STH picture

Freeze-out:

- Thermal equilibrium
- Thermal production
- $Y_\chi \longleftrightarrow \langle \sigma v \rangle_{\text{ann}}$
- IR dominated

The perturbative STH picture

Freeze-in:

- Not in equilibrium
- Thermal production
- $Y_\chi \longleftrightarrow \langle \sigma v \rangle_{\text{prod}}$
- IR dominated

The perturbative STH picture

Freeze-in:

- Not in equilibrium
- Thermal production
- $Y_\chi \longleftrightarrow \langle \sigma v \rangle_{\text{prod}}$
- IR dominated

The perturbative STH picture

Freeze-in:

- Not in equilibrium
- Non-thermal and thermal production
- $Y_\chi \longleftrightarrow \langle \sigma v \rangle_{\text{prod}}$
- UV dominated

The perturbative STH picture

Freeze-in:

- Not in equilibrium
- Non-thermal and thermal production
- $Y_\chi \longleftrightarrow \langle \sigma v \rangle_{\text{prod}}$
- UV dominated

The perturbative STH picture

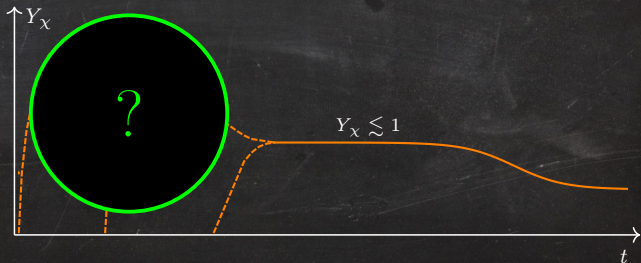

Freeze-in:

- Not in equilibrium
- Non-thermal and thermal production
- $Y_\chi \longleftrightarrow \langle \sigma v \rangle_{\text{prod}}$
- UV dominated

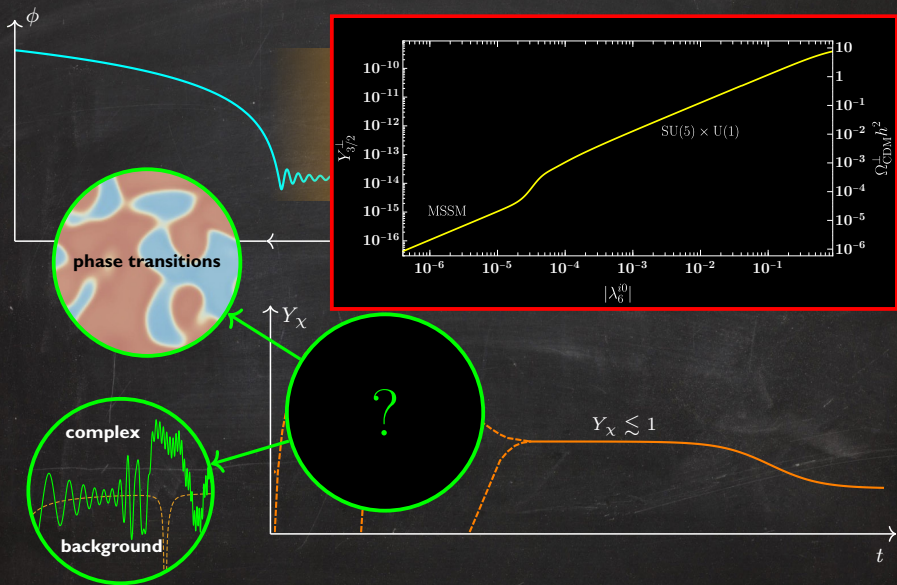

The perturbative non-STH picture

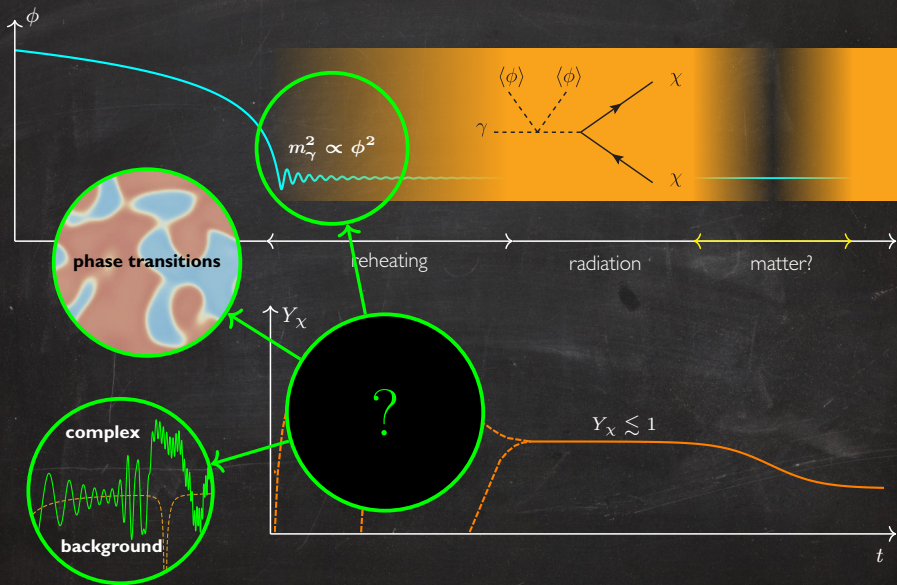

The perturbative non-STH picture

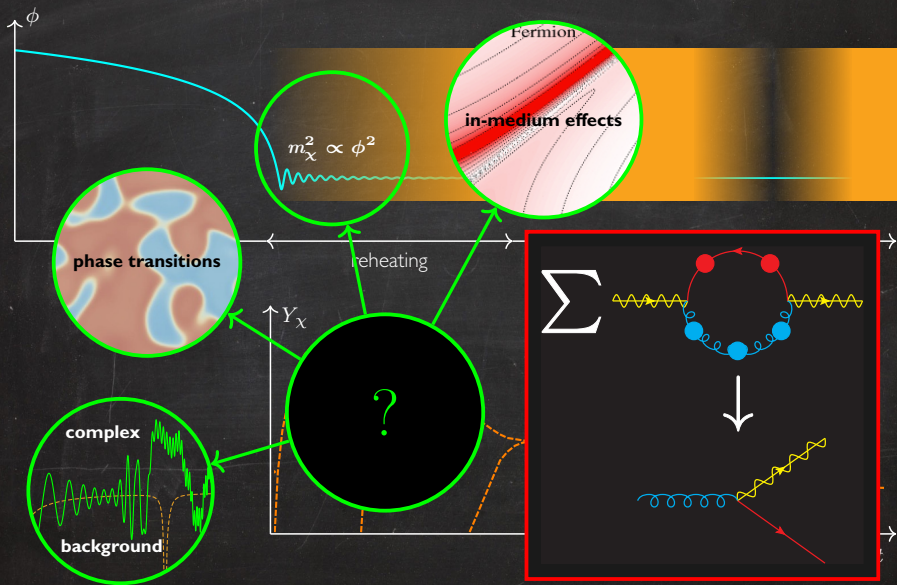

The perturbative non-STH picture

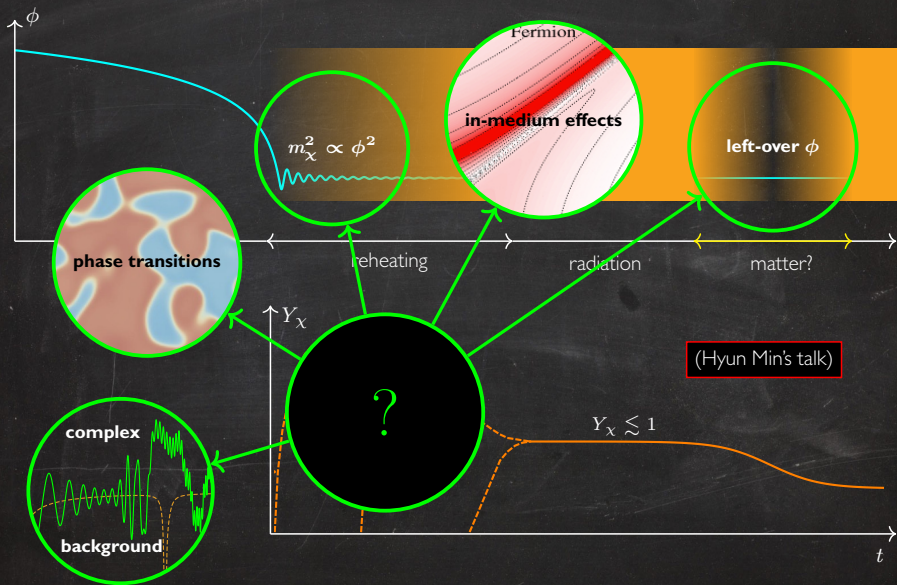

The perturbative non-STH picture

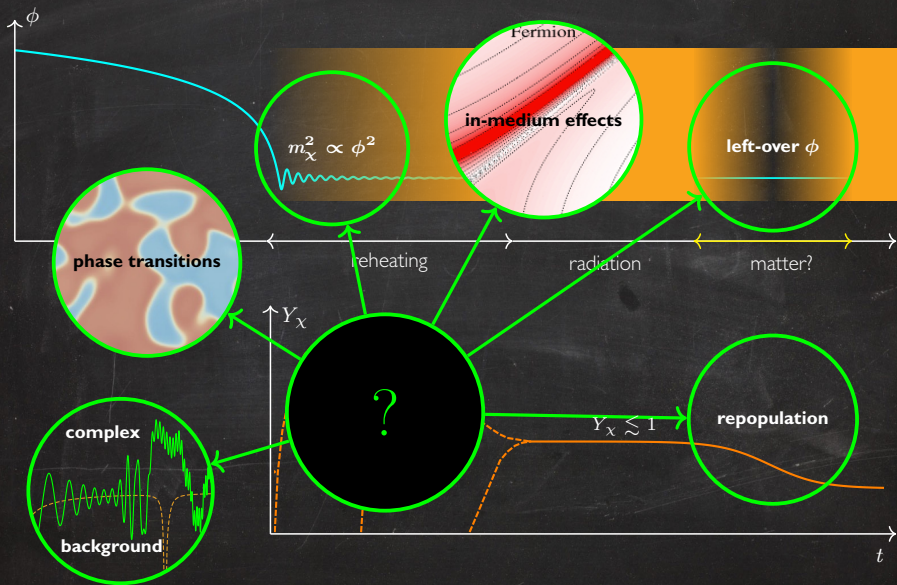

The perturbative non-STH picture

The perturbative non-STH picture

The perturbative non-STH picture

The non-perturbative picture

The non-perturbative picture

- (Stochastic) resonance \rightarrow preheating
- Tachyonic instabilities
- Instant preheating
- Fragmentation (self, gravitational)
- Formation of non-linear structures

The non-perturbative picture

Superheavy DM

Soliton DM

Topological DM

- (Stochastic) resonance \rightarrow preheating
- Tachyonic instabilities
- Instant preheating
- Fragmentation (self, gravitational)
- Formation of non-linear structures

The non-perturbative picture

Superheavy DM

Soliton DM

Topological DM

The non-perturbative picture

background dynamics \longleftrightarrow particle production \longleftrightarrow curvature fluctuations
 $\langle \chi_{k_1} \chi_{k_2} \dots \rangle$ $\langle \zeta_{k_1} \zeta_{k_2} \dots \rangle$

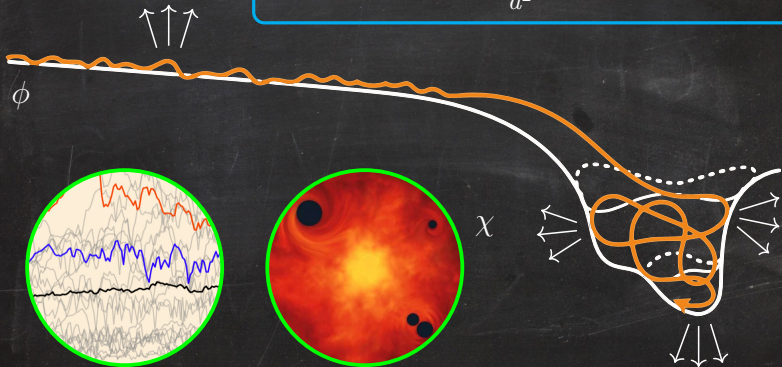

$$\ddot{\pi}_k + [3H + \mathcal{O}_d] \pi_k + \frac{k^2}{a^2} \pi_k = \mathcal{O}_s (\langle \chi \chi \dots \rangle_k)$$

The non-perturbative picture

background dynamics \longleftrightarrow particle production \longleftrightarrow curvature fluctuations
 $\langle \chi_{k_1} \chi_{k_2} \dots \rangle$ $\langle \zeta_{k_1} \zeta_{k_2} \dots \rangle$

$$\ddot{\pi}_k + [3H + \mathcal{O}_d] \pi_k + \frac{k^2}{a^2} \pi_k = \mathcal{O}_s (\langle \chi \chi \dots \rangle_k)$$

Discussion

- Dark Matter bestiary
 - What did I miss?

Discussion
